CREATIV' FOOD

Specialty Condiment: FLAVOR PEARLS Imported from: FRANCE

What are they?

Techniques of molecular gastronomy are used to create luminous Flavor Pearls.

Overall, they elevate your best dishes - as both an attractive garnish & superb flavor.

The alginate skin is inconspicuous, yet provides structure.

The inner pearl gives a burst of intense flavor, which comes chef-approved!

Use:

As a garnish to finish your dish

Keep submerged in the liquid until within an hour of serving

A jar has 1200+ pearls, easily garnering 120 servings

Background: Christine le Tennier & her team in Brittany, France are experts of seaweed, the key ingredient in this item. Their innovations in food have spanned several decades, with a strive for perfection that never ceases.
